

Aminogen

An all-natural product designed to help you assimilate protein into your system.

Just because you're enjoying a high-protein, low-calorie diet doesn't mean you are receiving all the benefits from the food you eat. For many, it will come as a surprise that the human body does not possess all the catalyzing enzymes it needs to break down the dietary proteins present in a given meal. Sometimes we actually need an "assist" to be able to assimilate all the nutritional benefits our food can provide.

That's where Aminogen® comes in.

With its patented enzyme technology, Aminogen® contains specially selected protein enzymes that act to improve the assimilation of dietary proteins. Simply take one tablet with each protein-containing meal. Then your body will be better able to assimilate the dietary protein present in your food. And you will achieve your best results when you take Aminogen® in conjunction with a Thermojetics® regimen and a balanced diet.

Discussion Points

- **Aminogen® is an all-natural dietary supplement that contains no animal products:** Take heart, vegetarians! You can use Aminogen® knowing you have not contributed to the demise of the world's dwindling non-human population. Aminogen® is made with natural ingredients.
- **Aminogen® works best when used as part of an Herbalife-based weight- or nutrition-management program:** As with the rest of Herbalife's "core" nutritional products, Aminogen® is a synergistic blend that was designed to work most effectively when it is used as part of your Thermojetics® health-maintenance regimen.

Fast Facts

- Aminogen® is based on patented enzyme technology available only from Herbalife.
- Also contains Calcium.
- Take one Aminogen® tablet with each protein-containing meal.
